Vaibhav Sugandhi

+91 7049009309 | Email | GitHub | LinkedIn | LeetCode

Professional Summary

Aspiring AI Engineer and Data Analyst with strong foundations in Machine Learning, Data Analytics, Generative AI, and software development. Skilled in Python, C++, SQL, Scikit-Learn, LLMs, and RAG-based systems, with hands-on experience building predictive models, AI applications, dashboards, and data-driven solutions.

Education

Vellore Institute of Technology, Bhopal Aug 2023 – May 2027
B.Tech in Computer Science (AI & ML) *CGPA: 8.88*

Technical Skills

Programming: Python, C++, SQL
AI/ML: Machine Learning, Deep Learning, Feature Engineering, Model Evaluation, Hyperparameter Tuning
Generative AI: LLMs, RAG, Prompt Engineering, LangChain, AI Agents, Vector Databases
Libraries/Tools: Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn, TensorFlow, Streamlit, Excel, MySQL, Git, GitHub

Personal Projects

AI Powered Resume to Job Description Gap Analyzer *Python • LLM • RAG • Machine Learning • Streamlit* | GitHub

- Developed an AI based application that compares resumes with job descriptions to identify matching skills, missing skills, and areas for improvement.
- Integrated LLM and RAG techniques to analyze resume and job description content and generate relevant job fit insights.
- Implemented semantic matching to compare candidate skills and qualifications with job requirements.
- Generated personalized recommendations for skill improvement, resume enhancement, and interview preparation.

Baby - Python-Powered Virtual Voice Assistant *Python • Speech Recognition • pyttsx3* | GitHub

- Developed a Python based voice assistant capable of understanding voice commands and automating common digital tasks.
- Integrated speech recognition, text-to-speech, Google search, web browser automation, and time-based responses.
- Implemented keyword-based command processing, exception handling, and timeout management using Python speech and automation libraries.

AI Based Student Cheating Detection System *Python • Scikit-Learn • Streamlit • Pandas* | GitHub

- Developed an AI based behavioral monitoring system to identify suspicious activities during online examinations using student activity data.
- Implemented and evaluated Random Forest, Decision Tree, and Logistic Regression models for behavioral classification.
- Achieved **94.2% accuracy** and integrated the trained models into a Streamlit interface for real-time analysis and prediction.

Work Experience

Codveda Technologies Sep 2026 – Present
Machine Learning Intern *Remote*

- Worked on machine learning projects involving data analysis, model development, testing, and algorithm optimization across 100K+ data records.
- Performed data preprocessing, exploratory data analysis (EDA), and feature engineering to prepare large-scale datasets for machine learning models.
- Trained and evaluated machine learning models using appropriate performance metrics to assess model effectiveness.
- Applied hyperparameter tuning techniques to improve model performance and support the development of reliable ML solutions.

Certifications

- **Oracle** – Agentic AI Professional Certification.
- **Microsoft** – DP-800: Microsoft Certified SQL AI Developer Associate.
- **NPTEL Gold** – Introduction to Internet of Things (IoT), IIT Kharagpur (91%).
- **University of Michigan** – Applied Machine Learning.

Co-Curricular & Extra-Curricular Activities

- Member of the **Hindi Club** at VIT Bhopal University, participating in literary and cultural activities.
